Outstanding Business Opportunity

PURCHASE A THRIVING CERTIFIED ORGANIC FREE RANGE EGG PRODUCING BUSINESS

- 5000 birds between 3-18 months
- BFA/ ACO certified
- Established 12 years
- Coffs Harbour/ Brisbane distribution area
- Business-ready land & sheds

A unique opportunity exists to invest in a ready-to-trade organic egg production business.

Heidi's Organic Eggs, where 'The test is in the taste!' is a well established business with a healthy, rising annual turn-over.

The business has a reliable client base with plenty of potential for expansion. Equipment is transferable.

Owners are retiring and are able to assist with any necessary training or transfer requirements.

For more information please contact Hans at Heidi's Organic Products Ph: (02) 6635 1479

Where water = "Blue Gold"

FOR SALE

A unique opportunity to purchase a certified organic farm in the resource rich Adelaide Hills, this ample four bedroom homestead and surrounds is country living at its finest.

The farm boasts the biggest bore in the region (over 20,000 gallons p/hr at 300 parts saline p/million) with an estimated 5 GL per day flow under the farm.

Although currently producing organic beef, the ample supply of water combined with over 80 acres of gently undulating brown to black alluvial clay based soils, rich in minerals creates the opportunity to expand into organic production of any type. The land has been deep ripped with lush, dense cropping and has been organically certified for five years.

Property has new fencing throughout, raceway through paddocks, two unused poultry sheds with 3 phase power access, cattle shed, machinery and garden sheds. Homestead is complete with lawns, rose and native flora gardens, a pond, 4 small dams, an orchard strip and a granny flat.

The farm is located 30 kms from the Adelaide CBD, between the country townships of Echunga and Meadows, with easy transport of livestock/produce via the major freeway situated 15 minutes away.

A truly idyllic property offering the very best in country living.

Property will be auctioned on Saturday the 12th January at 11am. For more details call

Soozie Feutrill

Registered Allowed Input Companies

Growers have an ever-increasing list of products they can rely on for use in organic systems. If the input that you wish to use is not listed here, contact your certification body for permission to use that input. If you have a product that you would like listed here, contact the BFA on 07 3350 5716 for information on registering this as an allowed input.

**WITH NEW ENTRUST[®]
NATURALYTE[®] IT'S NOW
EASIER BEING GREEN.**

We all know how hard organic farmers work to produce top quality fruit and vegetables that are beneficial for both the environment and the consumer. But it's now easier being green with the introduction of the world's first organic pest control in the Naturalyte class, Entrust.

Set to revolutionise the pest management programs of organic farmers, Entrust Naturalyte from Dow AgroSciences is formulated from a naturally occurring soil organism. The unique properties of Entrust enable organic farmers to combine the efficacy of conventional pest control with the benefits of an

entirely organic product. Now producers of tomatoes, vines, brassica vegetables, capsicums, lettuce, spinach, sweetcorn and pome fruit have an outstanding edge in the control of a wide range of caterpillar pests.

The result is cleaner produce and a higher yield of healthier organic fruit and vegetables. Entrust has received full organic approval from both international (OMRI) and local (BFA) organic certifying agencies.

For more information on the organic benefits of Entrust, call Dow AgroSciences on 1800 700 096 today.

 **Dow AgroSciences**
